Vulnerability

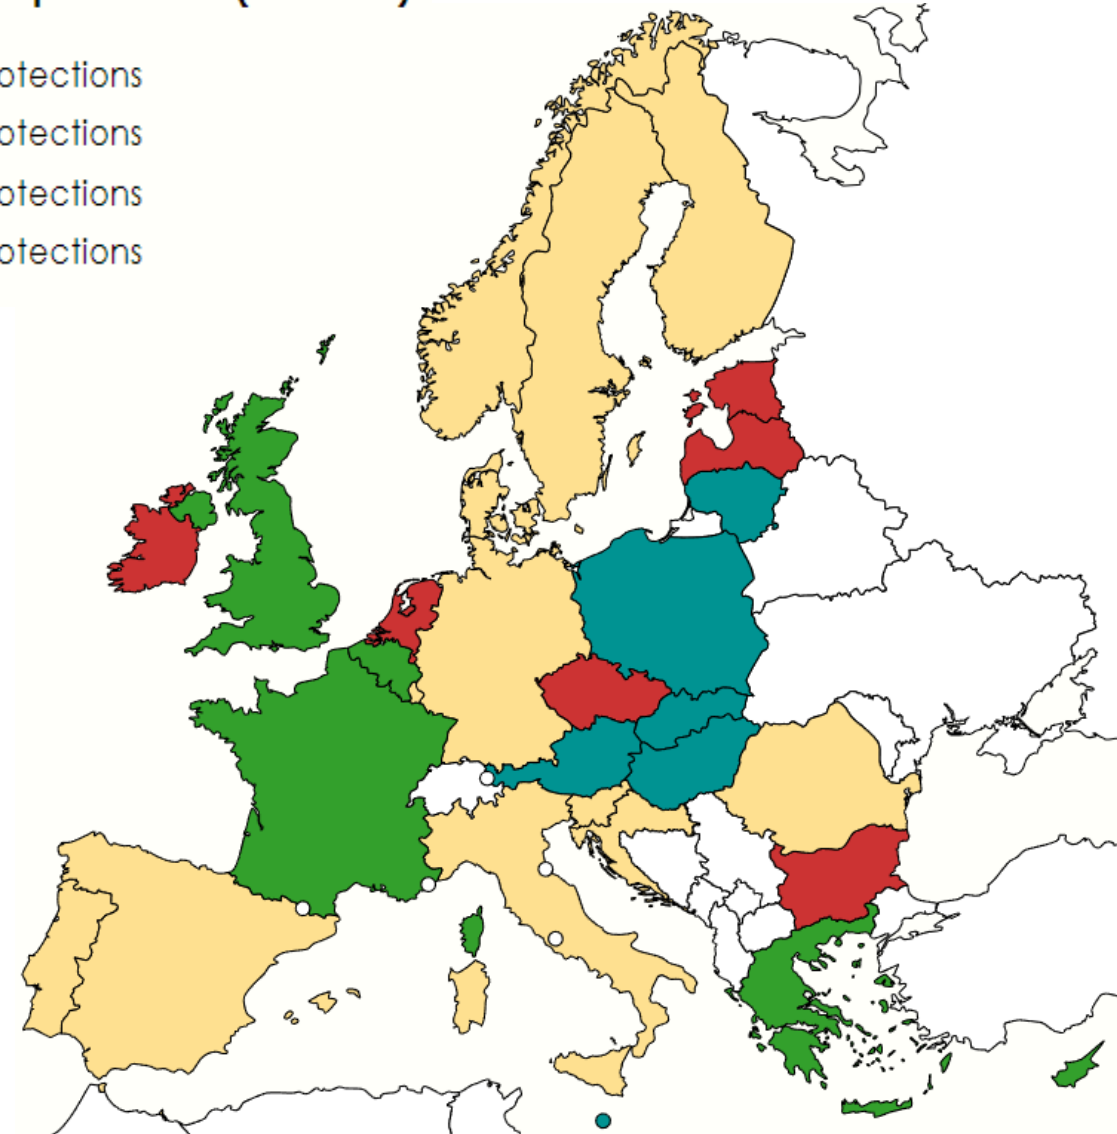

Wide range of situations beyond income levels:

- Critical dependence on electrical equipment for health reasons
- Socio-demographic factors (age, education)
- Mental and/or physical disabilities
- Larger family size
- Unemployment or remote locality
- Etc.

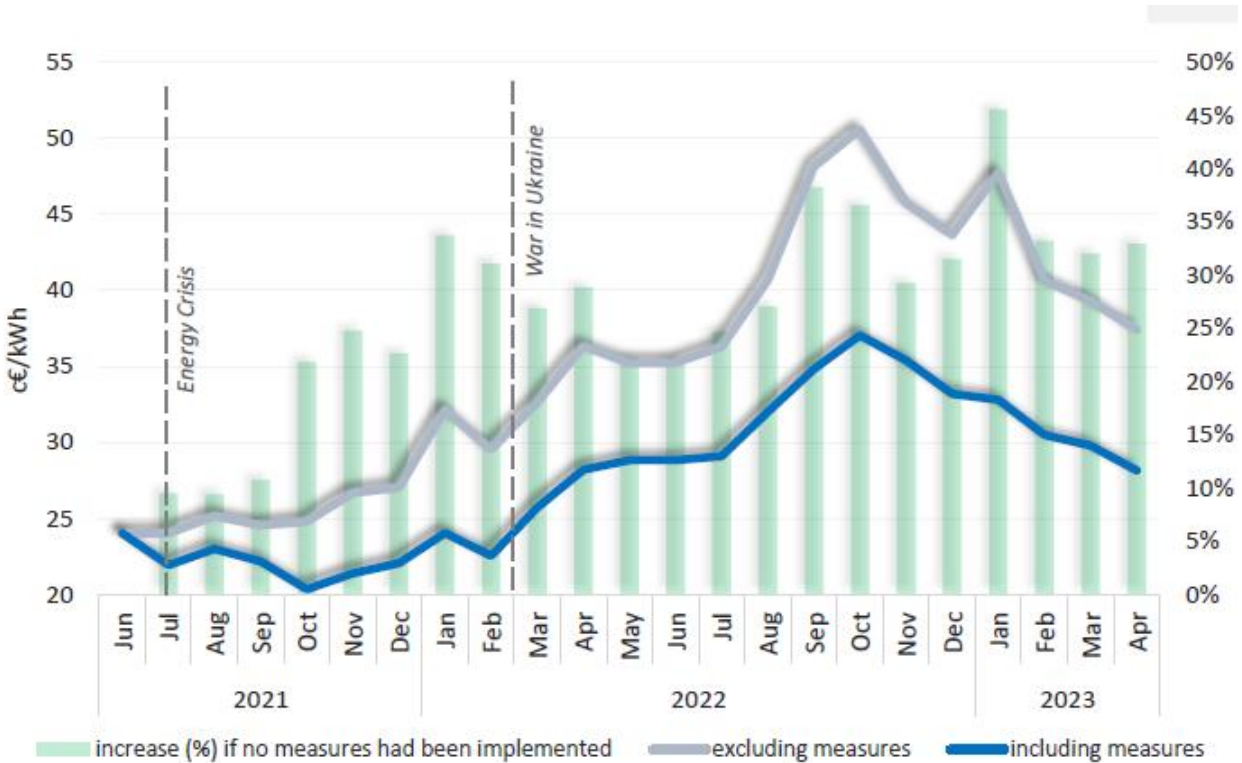

Energy poverty

A household's lack of access to essential energy services, which provide basic levels and decent standards of living and health, including adequate heating, hot water, cooling, lighting, and energy to power appliances

Number of protections (out of 11)

Electricity prices

Natural gas prices

Essential services

Access to basic energy services is a fundamental right for our citizens and a prerequisite for our societies and economies to grow

Affordability

Access to energy at a fair and affordable price should enable consumers to satisfy their energy needs

Independence & Democracy

Access to technology and services to produce (and sell / share) their own energy helps to empower consumers in managing security and price risks

Sustainability

Access to sustainable energy sources allows consumers to support the decarbonisation of society, giving them the power to choose how they meet their energy needs

Security

Access to uninterrupted, continuous and reliable energy keeps homes lit, businesses running and society developing

Protection

Access to reliable consumer rights and protection provides confidence to consumers, shields the most vulnerable and ensures responsible and responsive business practices in the energy sector

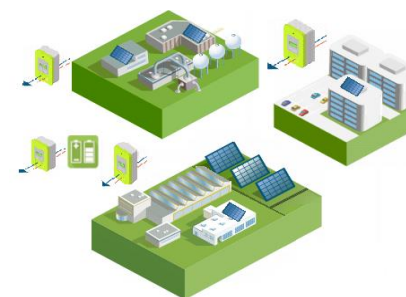

Residential building

Industrial site

Neighbourhood energy community

Industrial neighbourhood

Citywide neighbourhood

Horizon 2020 -
Compile Project
(Lisboa)

- 8 apartment buildings in 1 condominium
- 180 apartments willing to share rooftop PV electricity

Bondalti, chemical
industry (Porto)

- An intensive electricity user is building a 1MWp PV on site (only <1% of current energy consumption)

REC Agra do Amial,
EEA Grants Project (Porto)

- REC for a public small social housing district (181 apartments) and a public primary school.
- 130 kWp PV, 3 EV charging points and 115 kVA batteries

Sonae Maia industrial
complex (Porto)

- REC for an industrial area (3 prosumers), one storage unit, EV charging points.

POCITYF, Horizon 2020
(Évora)

- REC for a city centre residential area (11 buildings initially but with potential for dozens others)

Information. Information.
Information.

Ensure access to payment
plans for late bills and
clear rules for
disconnections

Continuous outreach on
energy efficiency
measures and benefits

Offer energy market
training and disseminate
materials for local public
bodies

Remove market and
regulatory barriers to self-
generation, energy
sharing and new services

Facilitate energy
community projects (esp.
participation of
vulnerable consumers)
